

..... Parking at
Santariškės
medical
campus

uni**P**ark

Parking situation before

- Outdated infrastructure not suitable for modern car traffic
- Huge parking space deficit for both doctors
- Visitors not finding parking places
- Continuous medical and ambulance work disruption
- Difficulty to pass for public transport
- Continuous traffic jams and reckless driving
- Insufficient police resources to control the situation

Over
10.000 road traffic offenders

.....

An aerial photograph of a city street intersection. A blue semi-transparent box is overlaid on the left side of the image, containing four lines of white text. The street is a multi-lane arterial road with a red and white bus in the center. There are several large parking lots filled with cars on both sides of the street. Buildings and trees are visible in the background.

Freed up the arterial road

Public transport traffic has been rearranged to normal

Radically reduced number of traffic offenders

Fewer complaints to police

A decorative graphic consisting of several concentric white circles with blue arrows pointing outwards, located in the bottom left corner of the blue overlay box.

#available places for cars

2 250 new parking places for visitors

Total 11 parking lots around the campus

Convenient payment method for service
#uniPark APP
